For this purpose employee and employer contributions each at the rate of 1.00% of salary and interest earnings attributable to funds held for the payment of superannuation allowances in excess of the rate assumed by the actuary are allocated to the Inflation Adjustment Account.

For analysis and comparative statistics see attached Schedules 4, 5 and 6.

For analysis and comparative statistics see attached Schedules 4, 5 and 6.

Section 21 - Actuarial and administrative expenses paid from the Fund amounted to $1,684,855. In addition, Investment Management Fees of $524,489 were paid by the Fund to the Provincial Treasury for Investment Services.

Section 26 - Long-term securities held by the trustee as at December 31, 1983 amounted to $1,153,969,453 par value, as set out in the attached Schedule 1.

Investment transactions during the year (par value) are summarized on the attached Schedule 3(a).

During the year, the average rate of return of long-term investments purchased was 12.552%. The net earned rate of the Fund was 10.510%.

An Investment Committee, consisting of the Commissioner of Municipal Superannuation and the Comptroller, Superannuation Commission, together with representatives from the Ministry of Finance and the Union of B.C. Municipalities Joint Advisory Committee on Pensions, met three times during the year to set guidelines and policy under which investments were to be purchased or sold.

During 1983, the Investment Committee continued the previous year's strategy of investing a major part of the new cash flow in the intermediate term bond market. During the year, the strategy maintained was one of investing 60% of the new cash flow in the intermediate bond market, and 40% in the 6-12 month sector of the money market. In all cases, these investments were in highly liquid instruments such as Government of Canada and Provincial bonds and government and bank paper in the money market.

The Superannuation Commission is responsible for cash management and advises the Provincial Treasury of funds available for investment.

The Provincial Treasury provides investment services to the Fund including investment management and safekeeping of securities. The charge for this service was $524,489.

Section 30(2) - An actuarial valuation of the assets and liabilities of the Fund is required to be made by an actuary from time to time at intervals of not more than five years. The most recent valuation was carried out as at December 31, 1982. This valuation disclosed an unfunded liability of $700,454,000 in respect of basic pension benefits, given the present statutory levels of employee and employer contributions.

AUDITOR'S REPORT

To the Commissioner of Municipal Superannuation Fund, and

To the Provincial Secretary and Minister of Government Services
Province of British Columbia:

I have examined the statement of financial position of the Municipal Superannuation Fund as at 31 December 1983 and the statement of changes in fund balance for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances.

In my opinion, these financial statements present fairly the financial position of the Fund as at 31 December 1983 and the changes in the fund balance for the year then ended in accordance with the stated accounting policies as set out in note 2 to the financial statements applied, after giving retroactive effect to the changes in the method of accounting for investments as explained in note 3 to the financial statements, on a basis consistent with that of the preceding year.

MUNICIPAL SUPERANNUATION FUND

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 1983

1. DESCRIPTION OF THE MUNICIPAL SUPERANNUATION PLAN

a) General

The plan is a defined benefit pension plan, whereby benefits are not linked directly to contributions. The plan is open to eligible employees of a municipality, hospital, school district, regional college or other employer to which the Pension (Municipal) Act applies.

b) Retirement Benefits

Members are eligible for unreduced benefits if they retire at age 55 with a minimum of 35 years contributory service, at age 60 with a minimum of 10 years contributory service and at age 65 with less than 10 years contributory service. Reduced pensions are available at age 55 with a minimum of 10 years contributory service, and at age 60 with less than 10 years contributory service.

Certain groups of employees are eligible for retirement benefits at an earlier age. Hospital employees must have a minimum of 10 years contributory service to be eligible for a pension benefit.

The plan provides a pension of 2% per year of service prior to age 65 up to a maximum of 70% of the average salary earned in the five highest earning years before retirement. At age 65, date of death, or disability there is a reduction in the formula as a result of the integration with the Canada Pension Plan. Reference should be made to the plan text for a more detailed description of the benefits.

c) Termination Benefits

A terminating employee may choose between leaving accumulated contributions on deposit or obtaining a refund. The refund includes interest credited. Employees leaving contributions on deposit for a minimum of 10 years are entitled to a deferred pension benefit if they have completed a minimum of 10 years contributory service.

d) Other Benefits

Disability and Survivor benefits are available under the plan.

2. SIGNIFICANT ACCOUNTING POLICIES

a) General Information

These financial statements show only the position of the Fund as at December 31, 1983 and the changes in Fund balance for the year then ended and do not purport to show the adequacy of the Fund to meet the obligations of the superannuation plan. The results of the latest actuarial valuation of the plan are described in Note 7 below.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

b) Investment Valuation and Investment Income

Long-term investments include bonds issued or guaranteed by Canada a Province or municipal authorities and deposits with chartered banks and other approved financial institutions purchased with terms in excess of one year. They are carried at cost of acquisition adjusted as follows:

(i) Discounts and premiums on single maturity bonds are amortized over the remaining terms of the bonds.
(ii) Discounts on serial bonds are recognized as income when redemptions occur.

Gains and losses on disposition of long-term bonds are deferred and amortized on a straight line basis over the lesser of the remaining terms of the bonds or twenty years. The amortization is charged against income from investments.

Short-term investments consist of deposits in chartered banks and other approved financial institutions. They are carried at cost of acquisition.

3. CHANGE IN ACCOUNTING POLICIES

In the year ended December 31, 1982 and prior years, premiums on purchase and gains and losses on disposition of long-term bonds were written off at the date of the transaction. Premiums and deferred gains and losses are now amortized on the bases described in Note 2(b). This change in accounting policy has been applied retroactive to October 1, 1980, when the Inflation Adjustment Account was established for the financing of pension increases.

The December 31, 1982 comparative figures have been restated to reflect the change in policy. Accordingly, the Fund balance at January 1, 1982 and the net increase in Fund balance for the year ended December 31, 1982 have been increased by $571,326 and $436,674 respectively. As a result, the Fund balance at December 31, 1982 and the basic portion thereof, previously reported as $1,442,440,512 and $1,306,444,199 respectively have been increased to $1,443,448,512 and $1,307,452,199 respectively.

The effect of this change on the results for the year ended December 31, 1983 has been to increase the net increase in Fund balance by $2,395,998.

MUNICIPAL SUPERANNUATION FUND

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 1983

4. LONG-TERM INVESTMENTS

Long-term investments held at the end of the year are as follows:

	1983 $	1982 $
Book Value	1,091,906,066	936,618,293
Par Value	1,153,969,453	941,201,953
Market Value	940,891,268	792,871,039

The difference between the book value and market value of the investments is not considered to be a permanent reduction of the Fund balance available for payment of plan benefits and therefore has not been provided for as at December 31, 1983, since it is generally expected that Fund investments will be held to maturity.

5. DEFERRED LOSSES LESS GAINS ON SALE OF INVESTMENTS

	1983 $	1982 $
Balance at beginning of year	835,385	571,327
Net losses on sale of investments during the year	2,281,288	347,460
	3,116,673	918,787
Amortization for the year	(44,162)	83,402
Balance at end of year	3,160,835	835,385

6. FUND BALANCE

The Fund balance is made up of a Basic Account, a Retirement Annuity Account and an Inflation Adjustment Account. The Inflation Adjustment Account was created in 1980 to finance the payment of cost of living supplementary allowances. These allowances are adjusted each January 1st and are related to the annual increase in the Consumer Price Index as at each previous September 30th, but may be limited by the availability of funds in the Inflation Adjustment Account to provide the capitalized value of the increases.

The Inflation Adjustment Account includes contributions by employees and employers each at the rate of 1% of salary, the interest income therefrom and the interest income on funds attributed to the payment of pensions in excess of the rate assumed by the actuary.

6. FUND BALANCE (Continued)

The Inflation Adjustment Account is decreased by refunds to former contributors and transfers to the Basic Account of the capitalized value of supplementary allowances granted.

During 1983 excess interest earnings of $27,837,520 ($28,364,863 in 1982) were transferred from the Basic Account to the Inflation Adjustment Account. Effective January 1, 1984, supplementary allowances at the rate of 5.0% (10.355% in 1983) of the basic lifetime portion of pensions in payment were granted. The capitalized value of these supplementary allowances was $21,428,474 ($28,498,667 in 1983), which amount was transferred from the Inflation Adjustment Account to the Basic Account.

7. ACTUARIAL VALUATION

According to the Pension (Municipal) Act, an actuarial valuation of the assets and liabilities of the Fund is required to be made by an Actuary from time to time at intervals of not more than five years. The most recent valuation was carried out as at December 31, 1982. The Actuary advised that the unfunded liability would be $700,454,000 for basic pension benefits. This represents an increase of $293,182,000 since December 31, 1979. The Actuary also stated that he did not see the increase in the unfunded liability as a threat to the continued payment of pensions to current and prospective pensioners or to the financial health of the plan.

The liabilities of the Fund are calculated under the "entry age normal" actuarial method. The future contributions required have been determined under the "level contribution funding" method. This method expresses employer contributions as the constant percentage of future payrolls that, together with future employee contributions and investment earnings, will finance the benefits for all new entrants to the plan to the extent that the unfunded liability is maintained as a constant percentage of future payrolls.

The key actuarial assumptions made in the valuation are as follows -

Salary growth	-	5-1/2% per annum.
Interest on fund assets	-	6-1/2% per annum.
Mortality - active employees	-	70% of the 1971 Group Annuity table for males and females respectively.
- other retired	-	Progressive Annuity Table rated up one year for males and down one year for females.
Withdrawal	-	Groups 1 and 2 - 100% of the select and ultimate experience using a three year select period. Group 3 - 80% of the ultimate rates used for the previous valuation. Group 4 - 95% of select and 90% of ultimate rates used for the previous valuation.
Retirement	-	Select and ultimate experience using a modified three-year select period.
Retirement age	-	50 - 65
